

Vitabrid C¹² SKIN

**Reduces irritation &
inflammation due to dryness!**

Grand Gold prize winner at 2016 Monde Selection®!

Transdermal vitamin C powder for skin/body concerns, reducing skin irritation and itchiness.

The application of our cutting-edge bio-hybrid technology and DPES (Drug Permeation Enhancement System) enables the delivery of stable vitamin C into the skin for 12 continuous hours. Vitabrid C12 Skin contains made-cassoside, also known as madecassic acid, aiding in skin rejuvenation while calming and addressing skin troubles such as atopy. It also strengthens the skin barrier helping protect from outside factors.

1. Key Benefits

- Antioxidant property relieves skin fatigue
- Eases irritation and itching
- Removes skin waste and keratin plugs
- Prevents dryness, moisturizes skin

2. Main Features

- **12 hour transdermal vitamin C powder** - It is an active vitamin C powder made from Vitabrid C12's patented technology that delivers vitamin C deep into the skin
- **Helps with toxin elimination** - It creates healthy and clean skin by removing the accumulated toxin in the body.
- **Eases irritation and itchiness caused by dry skin** - By combining and applying the SKIN powder with moisturizer, it supplies moisture to help with dryness while alleviating irritation and itchiness.

3. How to Use

1. Shake the bottle lightly to loosen powder just before application.
2. Pour an appropriate amount of powder by tapping the bottle 2 to 4 times into the palm of your hand.
3. Mix the powder with an appropriate amount of body lotion or moisturizer.
4. Smooth mixture on concerned or desired area of your body and massage gently for better absorption.

4. Ingredients

- Vitabrid CG - ascorbic acid, zinc oxide, glyceryl monostearate
- madecassoside, allantoin, betaine
